Attachment: Replacement Sheet

Amendment Under 37 C.F.R. § 1.111  
Serial No.: 10/782,958  
SUGHRUE MION, PLLC Ref: Q79874

**REMARKS**

Claims 9-39 are all the claims pending in the application. Claims 17-28 have been examined in the subject application.

The Examiner has requested that Figure 1 be corrected to identify the random light with reference numeral 16, rather than reference numeral 15. Accordingly, Applicants submit herewith corrected Figure 1.

The Examiner has also objected to the disclosure as containing a number of informalities. Applicants have amended the specification to change the designation from “C13 ... C20” to “13... 20,” per the Examiner’s request.

Applicants note with appreciation that there are no prior art rejections. Thus, the only remaining issue is a rejection of claims 17-28 under § 112 (first paragraph) as including claims which are not enabled by the disclosure and a § 112 (second paragraph) of claim 27 as being indefinite.

As to the former rejection, the Examiner contends that the ratio  $z$  of the solubility parameters, calculated from the evaporation energy, and the molecular volume of the photosensitive polymer and the low molecular weight compound is a critical and necessary element of the invention claimed in claim 17. In support of this assertion, the Examiner references Table 1 wherein it is indicated that when the ratio is above .93 and below 1.06, the evaluation of cloudiness is positive (good), whereas when the ratio is between .93 and 1.06, the evaluation of cloudiness is negative (poor). Thus, the Examiner has requested that the ratio range of larger than 0.93 and smaller than 1.06 be included in claim 17.

Amendment Under 37 C.F.R. § 1.111  
Serial No.: 10/782,958  
SUGHRUE MION, PLLC Ref: Q79874

To expedite prosecution and without prejudice, Applicants have amended claim 17 per the Examiner's request. Also, Applicants have amended claims 26-28 to more properly depend from claim 25.

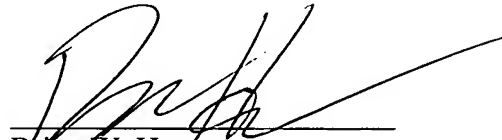

Finally, the Examiner has rejected claim 27 under § 112 (second paragraph) as being indefinite. Applicants have amended the claims to conform with U.S. practice and to overcome this rejection. For example, claim 25 has been amended to be in proper independent form (i.e., so as to not depend from a method claim) and claims 26-28 have been amended to depend from claim 25.

In view of the foregoing, it is submitted that the application is in condition for allowance. It is respectfully requested that the application be passed to issuance at the earliest possible convenience. If any points remain in issue which the Examiner feels may be best resolved through a personal or telephone interview, the Examiner is kindly requested to contact the undersigned at the telephone number listed below.
